

	NPI Submitted	Legacy ID associated to the NPI	Provider Name & Address on File with ForwardHealth	Type of Medicaid Certification	ZIP + 4	ForwardHealth Assigned Taxonomy	Billing ForwardHealth
1	1234567777	22222200	ABC Physician Group 123 Main St. Anytown, WI 53911-2222	Physician Group, Multi-specialty	53711-2222	193200000X	<p>Taxonomy code is required to distinguish between providers 1 & 2 (same NPI, same address).</p> <ul style="list-style-type: none"> ▪ Billing provider = Physician Group: Billing provider taxonomy goes in Loop 2000A (Billing /Pay To Provider) ▪ Rendering provider = Individual physician: Taxonomy of rendering provider goes in Loop 2310B (Rendering Provider) <p>NOTE: This example shows the limitation with the current version of the guide when the billing provider's taxonomy is needed. When the billing and rendering providers are different Loop 2000A cannot be used for the billing provider taxonomy. Loop 2310B is the rendering provider loop and will be used to report the rendering provider's taxonomy. There is no other place to report the billing provider's taxonomy. Medicaid will accept the taxonomy in both positions, but Medicare will not.</p>
2	1234567777	33333300	ABC Laboratory 123 Main St. Anytown, WI 53911-2222	Independent Lab	53911-2222	291U00000X	<p>Taxonomy code is required to distinguish between providers 1 & 2 (same NPI, same address). The laboratory is both the billing and rendering provider. Billing provider taxonomy can go Loop 2000A.</p>
3	1234567777	44444400	ABC Physician Group 756 Oak St. Anytown, WI 52608-3333	Physician Group, Multi-specialty	52608-3333	193200000X	<p>Zip+4 code is required to distinguish between providers 1 & 3 (same NPI, same taxonomy). Billing provider's taxonomy code is not needed because a match can be made on the ZIP+4. Billing provider's physical location Zip+4 on file with ForwardHealth is reported in Loop 2010AA.</p>
4	4567811111	55555500	ABC Medical Vendor 123 Main St. Anytown, WI 53911-2222	Medical Vendor (DME)	53711-2222	332B00000X	<p>NPI distinguishes between provider 1, 2 & 3 and provides a one-to-one match. Taxonomy and Zip+4 code are not needed.</p>
